

Offene Abschlussarbeit mit dem Thema:

How to deal with inaccurate sensor data?

Typ:	Bachelorarbeit	Beginn:	-
Gutachter:	Prof. Dr. Manfred Reichert	Betreuer:	Albi Dode
Projekt:	-		Raum 544
Ext. Partner:	-		albi.dode@uni-ulm.de

Kurzbeschreibung:

Data coming from mobile or wearable sensors might be inaccurate. It also might happen that the sensors are not properly calibrated. Another aspect to be considered is the inaccuracy between the data sensed from wearables and the smartphone. The wearable might show slightly different numbers compared to the smartphone.
