

Offene Abschlussarbeit mit dem Thema:

Allergies and tinnitus

Typ:	Bachelorarbeit	Beginn:	-
Gutachter:	Prof. Dr. Manfred Reichert	Betreuer:	Albi Dode
Projekt:	-		Raum 544
Ext. Partner:	-		albi.dode@uni-ulm.de

Kurzbeschreibung:

Since allergies cannot be sensed, but still they might impact tinnitus patients, we aim to see if we can integrate a system for allergies related to tinnitus patients. The precision level for it can vary from typical allergies for a country, to most common allergies per city zone. Available services which offer allergies data might be used and can be further enriched. Mining text from the blog built inside the tinnitus app might be considered.
